SUMMARY

Information Technology student who builds interactive web applications with React and TypeScript, with additional work in Flutter, Java and C++. Has shipped four live projects, including a webcam hand-tracking browser console and an interactive history of programming, and built a no-code content management feature for a client web platform.

SELECTED PROJECTS

Webii / Hand-tracking browser console — ashen360.github.io/Webii

TypeScript · MediaPipe · Canvas 2D · Web Audio · Vite · Vitest

- Built a browser console controlled by webcam: the index finger moves the cursor and a pinch acts as a click, with all tracking running locally in the browser.
- Designed calibration into onboarding and shipped three Canvas 2D games and three themes.

Hello, Machine / Interactive history of programming — ashen360.github.io/hello-machine

HTML · CSS · JavaScript · Three.js · Canvas

- Created a scrollytelling essay of seven chapters and a finale, 1837 to LLMs, each built from its era's medium: a punched card that spells HELLO, valves that set a byte, and a working BASIC terminal.
- Re-themes the whole page per era, with accessibility considered throughout. Written without a build step.

Cucina De Marquina CMS / Versatily web ecosystem — 2024

React · Express.js

- Developed a content management feature that lets users create, edit and publish reviews through a no-code interface. Work as researcher and developer earned two SHS Expo section awards.

WordWeaver / Category word puzzle — ashen360.github.io/WordWeaver

React · GitHub Pages

- Built a puzzle game where players find groups of four related words in a shuffled grid, with difficulty levels from everyday topics to computer science concepts.

EasyRead / Dyslexia support app — Android

Flutter · Dart

- Developed a mobile app that runs locally and uses AI assistance to give students with dyslexia real-time text simplification, explanations and summaries.

Also built: Sining Filipino, an interactive timeline of Philippine art (HTML, CSS, JavaScript) · Vremia, an Android scheduling and reminders app (Java) · Transactsys, a C++ console shop with cart and .txt receipts

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, C#, C++, Dart
Web & Mobile	React, Next.js, Express.js, HTML, CSS, Three.js, MediaPipe, Flutter
Databases	MySQL, MongoDB, Supabase
Tools	Git, GitHub, Vite, Vitest, Vercel, VS Code, Visual Studio

EDUCATION

FEU Roosevelt Marikina / BS Information Technology — 2025 – Present

Technological Institute of the Philippines, Quezon City / BS Information Technology — 2024 – 2025

STI College Marikina / SHS, Information Technology (Mobile App and Web Dev) — 2022 – 2024

AWARDS

Top 10 Finalist, Innov8 Ideathon by Microsoft Student Community · TIP Manila, 2024

Best in Communication and Best Use of Expo Theme, SHS Expo · STI College Marikina, 2024

2nd Runner-up, Codefest Tagisan ng Talino · 2023

3rd Place, Interdepartmental General Information and Current Events Quiz Bee · TIP Quezon City
